

SYSTEM AND METHOD FOR ACCESSING AND PRESENTING
REPRESENTATIVE APPOINTMENT INFORMATION

ABSTRACT OF THE DISCLOSURE

5 The present invention relates generally to systems, methods and software applications for storing, retrieving, and displaying information. More particularly, the present invention relates to providing a comprehensive, interactive tool for storing, retrieving, and displaying financial representative appointment information. The method of the present invention comprises the steps of receiving appointment information; analyzing and sorting the received
10 appointment information; saving the received appointment information; providing an interactive display of the received appointment information; and allowing access to the displayed received appointment information.
